Remediation Ltr 1989.pdf

Can any of you by chance tell me anything about this letter sent to me by Wendy Lumetta, concerned citizen of Bridgeton? She has been citing the language in this letter in emails and conversations with me for some time and just sent it to me this week. It's not on NRC letterhead and is not signed, but I don't have other reasons to doubt it's legitimacy. I just wonder how to view this letter in light of the years of work since 1989. When she sent it to me, she wrote in part:

"Attached please find the letter from Robert Bernaro, Director of the Office of Nuclear Safety and Safeguards. I'd appreciate an understanding of how a Federal expert said West Lake is harmful in 1989, but in 2013 the State of Missouri says it's not. Please explain."

Dan, head's up, I'll probably need to forward some or most of her concerns your way.

Jonathan D. Garoutte, Chief
